Subject index

Abbreviations; PN, parenteral nutrition; TPN, total parenteral nutrition

A

Acid-base status in uraemic rats, splanchnic, 116
Admission to hospital, screening for malnutrition by nurses and junior doctors on, 336
AIDS (and HIV disease), 197
  home PN, 213
Airway disease, chronic obstructive, 64
Alcohol-induced liver cirrhosis, glycerol metabolism in, 237
Amikacin pharmacokinetics in critically-ill patients on TPN, 254
Amino acid(s)
  brain and muscle levels during glutamine supplementation, remote injury-induced changes, 365
  intestinal, *see* Intestine
  sulphur, metabolism in infants on PN, 381
Amino acid dipeptide solution and its effects on nitrogen balance and humoral growth factors in postoperative state, 97
Ascorbic acid stability in standard TPN mixture, 139

B

Bags, EVA and multilayered, thiamine in TPN mixtures stored in, stability, 295
Biliary cirrhosis, nutritional assessment, 29
Bioimpedence instruments, multi-frequency
  Cole-Cole plots to compare two, 307
  potassium (total body) prediction in cystic fibrosis patients using, 348
Biotin deficiency complicating long-term TPN, 186
Bone, dual energy X-ray absorptiometry for measurement of, 263
Bone marrow transplant patients, oral glutamine supplementation, 162
Bowel, *see* Intestine
Brain amino acid levels during glutamine supplementation, remote injury-induced changes, 365
Brazil, clinical nutrition in, 56
Breath tests using ^{13}C-labelled nutrients to measure digestion of fat and carbohydrate, 149
Burn patients, severely, vitamin and trace element supplementation in long-term enteral and parenteral nutrition, 289

C

Calorimeter, Deltatrac indirect, practical limitations of, 155
Cancer
  colonic, inflammatory bowel disease-associated risk, 50
  enteral nutrition by percutaneous endoscopic gastrostomy, 17
Carbohydrate
  ^{13}C-breath tests to measure digestion of, 149
  protein meals supplemented with, increased intestinal amino acid retention in, 354
Carbon-13 breath tests to measure digestion of fat and carbohydrate, 149
Cardiac ischaemia/reperfusion injury in isolated perfused rat, 123
Catabolic response to zymosan challenge in rats, enterally-administered glutamine-rich protein and its effects on, 105
Cellular hydration, metabolism regulated by, 4
Central vs. peripheral vein access for PN in newborn, 303
Children
  on haemodialysis in chronic renal failure, energy balance in, 341
  very young, *see* Infants
Cirrhosis (liver)
  glycerol metabolism in alcohol-induced, 237
  primary biliary, nutritional assessment, 29
Cole-Cole plots to compare two multi-frequency bioimpedence instruments, 307
Colitis
  fuel deficiency and, 13
  ulcerative, folate status/DNA methylation/colon cancer risk in, 50
Colon cancer risk in inflammatory bowel disease, 50
Critical illness
  amikacin pharmacokinetics in TPN in, 254
  amino acids in intestinal mucosa and effects of, 54
  IGF system in, pathophysiology and therapeutic potential, 321
  multiple frequency impedance measurements, 42
Crohn's disease, long-chain triglycerides reducing efficacy of enteral nutrition in, 229
Cystic fibrosis patient
  enteral feed intravenously administered by accident, 313
  multi-frequency bioimpedence for predicting total body potassium, 348

D

Deltatrac indirect calorimeter, practical limitations of, 155
Dicarboxylic acids as alternative fuel substrate in PN, 143
Dipeptide solution and its effects on nitrogen balance and humoral growth factors in postoperative state, 97
DNA methylation in inflammatory bowel disease, 50
Doctors, junior, malnutrition screening at hospital admission by, 336
Domiciliary PN, *see* Home PN
Dual energy X-ray absorptiometry for measurement of bone and soft tissue, 263

E

Education in nutrition: attitude and involvement of clinician in nutritional support, 191
Elderly chronically-ill patients, reversibility of protein-energy malnutrition, 81
Endoscopic gastrostomy in cancer/non-cancer patients, enteral nutrition by percutaneous, 17
Endotoxin effects on GI transit time and intestinal permeability, 35
Energy intake
  deficiencies, pouchitis/colitis and, 13
  in TPN, effects on protein/energy metabolism, 47
Energy metabolism/balance
  in haemodialysis patients in chronic renal failure, 341
  non-protein energy intake during TPN and its effects on, 47
  in partially hepatectomized rats, fat emulsion containing MCFA/LCFA and its effects on, 23
Energy substrate, dicarboxylic acids as alternative, in PN, 143
Enteral feed, accidental intravenous administration in cystic fibrosis patient, 313
Enteral nutrition
  burned patients on long-term, severely, vitamin and trace element supplementation, 289
  in Crohn's disease, long-chain triglycerides reducing efficacy of, 229
  glutamine-rich protein in, effects on catabolic response to zymosan challenge in rats, 105
  by percutaneous endoscopic gastrostomy in cancer/non-cancer patients, 17
  Third National Survey in UK (1994), 329
Enteral supplement, pre-operative, effect on peripheral leucocyte functional activities, 275
European project, study of postoperative hypocaloric peripheral PN, 88
EVA bags, thiamine in TPN mixtures stored in, stability, 295

F

Fat, ^{13}C-breath tests to measure digestion of, 149
Fat/lipid emulsions, intravenous
  fatty acid tissue profile manipulation by, 177
  gastric emptying in rats and effects of, 249
  MCFA/LCFA-containing, effects on protein and energy metabolism in partially hepatectomized rats, 23
Fatty acids
  medium and long-chain, *see* Long-chain triglycerides/fatty acids; Medium-chain triglycerides/fatty acids
  tissue profile, manipulation by intravenous lipids, 177
Folate status in inflammatory bowel disease, 50
Fuel supply, *see* Energy

G

Gastric emptying in rats on TPN, effects of intravenous lipids on, 249
Gastrointestinal transit time, endotoxin effects, 35
Gastrostomy in cancer/non-cancer patients, enteral nutrition by percutaneous endoscopic, 17
Glutamine
  brain and muscle amino acid changes due to remote injury during supplementation with, 365
  oral supplementation in bone marrow transplant patients, 162
  Oxford Workshop, 129
  S6 peptide kinase inhibition in rat hepatocytes by, 45
Glutamine-rich protein, enterally-administered, effects on catabolic response to zymosan challenge in rats, 105
Glycerol metabolism in alcohol-induced liver cirrhosis, 237
Growth factors in postoperative state, amino-acid dipeptide solution and its effects on, 97

H

Haemodialysis in chronic renal failure, energy balance in children and adults, 341
Heart, ischaemia/reperfusion injury in isolated perfused rat, 123
Hepatectomized rats, protein and energy metabolism in partially, fat emulsion containing MCFA/LCFA and its effects on, 23
Hepatic cirrhosis, *see* Cirrhosis
Hepatocytes, S6 peptide kinase in rat, glutamine inhibiting, 45
HIV disease, *see* AIDS

Home PN
in AIDS, 213
quality of life on, 219
Hormones in postoperative state, amino-acid dipeptide solution and its effects on, 97
Hydration, cellular, metabolism regulated by, 4
Hypocaloric peripheral PN, postoperative, 88

I

Impedance measurements, *see* Bioimpedence instruments
Infants on PN
newborn, central vs. peripheral vein access for PN in, 303
sulphur amino acid metabolism, 381
Inflammatory bowel disease
folate status/DNA methylation/colon cancer risk in, 50
glutamine therapy in experimental, topical, 283
Injury, *see* Trauma
Insulin-like growth factor system in critical illness, pathophysiology and therapeutic potential, 321
Insulin-like growth factor-1 as indicator of nutritional status, 74
Intestine/bowel
amino acids
increased retention in carbohydrate-supplemented protein meals, 354
surgical trauma and critical illness affecting mucosal levels of free, 54
inflammatory disease, *see* Inflammatory bowel disease
permeability, endotoxin effects, 35
Intravenous nutrition, *see* Parenteral nutrition; Venous administration
Ischaemia/reperfusion injury in isolated perfused rat heart, 123

J

Junior doctors, malnutrition screening at hospital admission by, 336

K

Kidney failure, energy balance in children and adults receiving haemodialysis in chronic, 341

L

Leucocyte, peripheral, influence of pre-operative enteral supplement on functional activities, 275
Lipid, *see* Fat; Fat emulsions
Liver, *see* Cirrhosis; Hepatectomized rats
Long-chain triglycerides/fatty acids
enteral nutrition in Crohn's disease and effects of, 229
parenteral, protein and energy metabolism in partially hepatectomized rats and effects of, 23
Lung disease, chronic obstructive, 64

M

Malnutrition screening, *see* Screening
Medium-chain triglycerides/fatty acids, effects on protein and energy metabolism in partially hepatectomized rats of fat emulsion containing, 23
Metabolism, *see also specific substrates*
cellular hydration in regulation of, 4
non-protein energy intake during TPN and its effects on, 47
in partially hepatectomized rats, fat emulsion containing MCFA/LCFA and its effects on, 23
Mucosa, amino acids in intestinal, surgical trauma and critical illness affecting, 54
Multi-frequency bioimpedence instruments, *see* Bioimpedence instruments
Multiple frequency impedance measurements in critical illness, 42
Muscle amino acid levels during glutamine supplementation, remote injury-induced changes, 365
Myocytes, succinic acid methyl ester metabolism in, 166

N

Newborn, central vs. peripheral vein access for PN in, 303
Nitrogen balance, amino-acid dipeptide solution and its effects on postoperative, 97
Nurses, malnutrition screening at hospital admission by, 336

O

Obstructive pulmonary disease, chronic, 64
Oxford Glutamine Workshop, 129

P

Parenteral nutrition (predominantly intravenous)
in AIDS, 213
burned patients on long-term, severely, vitamin and trace element supplementation, 289

dicarboxylic acids as alternative fuel substrate in, 143
fat emulsions in, *see* Fat emulsions
home, *see* Home PN
hypocaloric peripheral, postoperative, 88
infants on, *see* Infants
organic phosphates in, stability/safety, 317, 373
quality assurance in, 61
Third National Survey in UK (1994), 329
total, *see* Total PN
Peptide kinase, S6, in rat hepatocytes, glutamine inhibiting, 45
Percutaneous endoscopic gastrostomy in cancer/non-cancer patients, enteral nutrition by, 17
Peripheral leucocyte functional activities, influence of pre-operative enteral supplement on, 275
Peripheral PN
central vs., in newborn, 303
hypocaloric, postoperative, 88
Permeability, intestinal, endotoxin effects, 35
Pharmaceutical care in nutritional support, 1
Phosphates in PN admixtures, organic, stability/safety, 317, 373
Postoperative patients
amino acid dipeptide solution and its effects on nitrogen balance and humoral growth factors in, 97
hypocaloric peripheral PN, 88
Potassium prediction in cystic fibrosis patients, multi-frequency bioimpedence for total body, 348
Pouchitis and fuel deficiency, 13
Pre-operative enteral supplement, effect on peripheral leucocyte functional activities, 275
Protein, metabolism (turnover etc.)
non-protein energy intake during TPN and its effects on protein, 47
in partially hepatectomized rats, fat emulsion containing MCFA/LCFA and its effects on, 23
Protein-energy malnutrition in elderly chronically-ill patients, reversibility, 81
Protein kinase, S6, in rat hepatocytes, glutamine inhibiting, 45
Protein meals, increased intestinal amino acid retention with carbohydrate added to, 354
Pulmonary disease, chronic obstructive, 64

Q

Quality assurance in PN, 61
Quality of life on home PN, 219

R

Ranitidine stability in TPN mixtures, 171
Renal failure, energy balance in children and adults receiving haemodialysis in chronic, 341
Risk score (nutritional) in nutritional screening, evaluation of a simple, 269

S

S6 peptide kinase in rat hepatocytes, glutamine inhibiting, 45
Screening for malnutrition in hospitals
on admission, by nurses and junior doctors, 336
evaluation of simple Nutritional Risk Score, 269
Soft tissue, dual energy X-ray absorptiometry for measurement of, 263
Splanchnic acid-base status and urea metabolism in uraemic rats, 116
Stomach, *see entries under* Gastr-
Succinic acid methyl ester metabolism in myocytes, 166
Sulphur amino acid metabolism in infants on PN, 381
Surgery
after, *see* Postoperative patients
enteral supplement preceding, effect on peripheral leucocyte functional activities, 275
trauma of, amino acids in intestinal mucosa affected by, 54

T

Thiamine stability in TPN mixtures stored in EVA and multilayered bags, 295
Total PN
amikacin pharmacokinetics in critically-ill patients on, 254
ascorbic acid stability in, 139
biotin deficiency complicating long-term, 186
non-protein energy intake during, effects on protein/energy metabolism of, 47
ranitidine stability in mixtures for, 171
thiamine stability in mixtures stored in EVA and multilayered bags, 295
Trace element supplementation in severely burned patients on long-term enteral and parenteral nutrition, 289
Transit time, gastrointestinal, endotoxin effects, 35
Transplants, bone marrow, oral glutamine supplementation in patients receiving, 162
Trauma/injury
brain and muscle amino acid level changes due to remote, during glutamine supplementation, 365
surgical, amino acids in intestinal mucosa and effects of, 54
Triglycerides, *see* Long-chain triglycerides; Medium-chain triglycerides

U

Ulcerative colitis, folate status/DNA methylation/colon cancer risk in, 50
Undernutrition, screening for, *see* Screening
United Kingdom, artificial nutrition support in hospitals in, Third National Survey (1994), 329
Urea metabolism
  dietary intake restriction and its effects on, severe, 242
  in uraemic rats, splanchnic, 116

V

Venous administration
  of enteral feed, accidental, in cystic fibrosis patient, 313
  in PN, *see* Central vein access; Peripheral PN
Vitamin(s), supplementation in severely burned patients on long-term enteral and parenteral nutrition, 289
Vitamin B_1 stability in TPN mixtures stored in EVA and multilayered bags, 295
Vitamin C stability in standard TPN mixture, 139

X

X-ray absorptiometry for measurement of bone and soft tissue, dual energy, 263

Z

Zymosan challenge in rats, enterally-administered glutamine-rich protein and its effects on catabolic response to, 105

Clinical Nutrition (1995) **14**, 399–400
